

Bring on the HEAT!

Heat – 33° Degrees Celsius – from friction melds C² Seal into concrete floors for gloss and durability beyond compare. And no pad gives you 33° C faster and longer than the C² HEAT High-Performance Burnishing Pad.

- Embedded heat-shield stops rising heat and bounces it back into the floor
- Double-sided for double service life
- All-natural fibers glued together with non-transferring resin – no resin trails left on floor
- It's custom-made for burnishing C² Seal, but also pops the shine on any hardened/densified floor.
- Stocked in 27-inch, 24-inch, 20-inch, 7.5-inch pads
- Special order in 17 specialty sizes 9 - 28-inch pads
- Costs less than most comparable pads

HEAT

High-Performance Burnishing Pad

"I get 3,000 square meters out of these pads, easy. I get done faster and they cost me less than any other pad I've used. Results? I get gloss-meter readings of 70 to 80. The secret is the heat."

– Ron Rynder
On Site Services, Atlanta, GA

"I ran a diamond (impregnated) pad on the floor and got a gloss reading of 49. I went over it with the HEAT pad and it went up to 54. You could see the difference. It's the heat that does it."

– Rob Harris
Flesner Floors, Payson, IL
